

# FedFlex™ Comprehensive

## Your Sponsorless Path to FedRAMP Authorization

### Overview

Breaking into the federal cloud market requires more than just FedRAMP authorization—it demands speed, scalability, and expert support. Traditional paths are slow, resource-heavy, and often stall growth. FedFlex Comprehensive changes that.

FedFlex Comprehensive is Anitian's fully integrated platform and advisory solution, purpose-built to help SaaS companies achieve and maintain FedRAMP Moderate or High authorization—faster and with greater control. Our agentic AI-powered platform combines automation, pre-built infrastructure, and expert guidance to help you reach audit readiness in as little as 3 months, while reducing prep costs by up to 60%.

### What You Get

- End-to-end platform automation and lifecycle support
- Pre-configured cloud architecture for AWS and Azure
- Guidance from FedRAMP experts and security architects
- Document automation & centralized evidence collection
- Built-in continuous monitoring and POA&M reporting
- Strategic visibility and audit-ready posture in record time

### Why Anitian

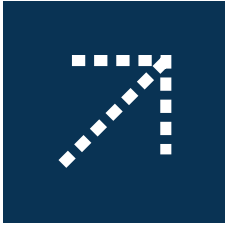

**Faster time-to-revenue:** Reach audit readiness in as few as 3 months

**Lower cost of compliance:** Reduce preparation and advisory costs by up to 60%

**Own your ATO:** Maintain control of your environment and your FedRAMP marketplace listing

**Ongoing Compliance Support:** Integrated platform support for continuous monitoring and reporting

**Designed for scale:** Built-in architectural flexibility for AWS and Azure environments

## Solution Overview

FedFlex Comprehensive is Anitian's end-to-end compliance automation platform for SaaS companies targeting FedRAMP Moderate or High. It includes everything you need to prepare for your 3PAO audit, achieve authorization, and maintain compliance—without relying on disconnected tools or resource-heavy consulting.

### Insights

- SaaS gap assessment scanner
- Programmatically evaluates 85 FedRAMP technical controls in AWS & Azure environments
- Dashboard provides actionable insights and a list of remediation tasks – prioritized by severity

### Gap Assessment

- Short-term advisory assessment
- Scoping guidance against the most impactful 144 FedRAMP controls
- Provides high-fidelity clarity on resource requirements and informs project planning

### Compliance Automation Platform

- Cloud-native, pre-configured, automated security platform
- Enables streamlined implementation of technical controls and data collection for securing and monitoring AWS & Azure environments
- Passive data collection for control monitoring
- Built for ease of deployment, robustness & architectural flexibility

### Integrated Advisory & Automated Documentation Generation

- Includes architectural guidance, gap closure, and document generation
- Live support throughout the FedRAMP lifecycle
- Centralized evidence collection and real-time audit prep

### SecOps Continuous Monitoring

- FedRAMP control monitoring & scanning
- Threat detection & response
- Vulnerability management & remediation tracking
- Monthly Plan of Action & Milestone (POA&M) reports
