# FedFlex™ by Anitian

The Compliance Automation  
Platform Built for Scale

## Executive Summary

Federal agencies are accelerating adoption of cloud-native technologies, and SaaS providers that meet FedRAMP requirements are better positioned to win contracts and grow revenue in the public sector. Yet for most vendors, the path to FedRAMP authorization has been long, expensive, and filled with operational friction. Legacy approaches rely heavily on manual processes, agency sponsorship, and costly consultants—slowing down go-to-market efforts and draining technical resources.

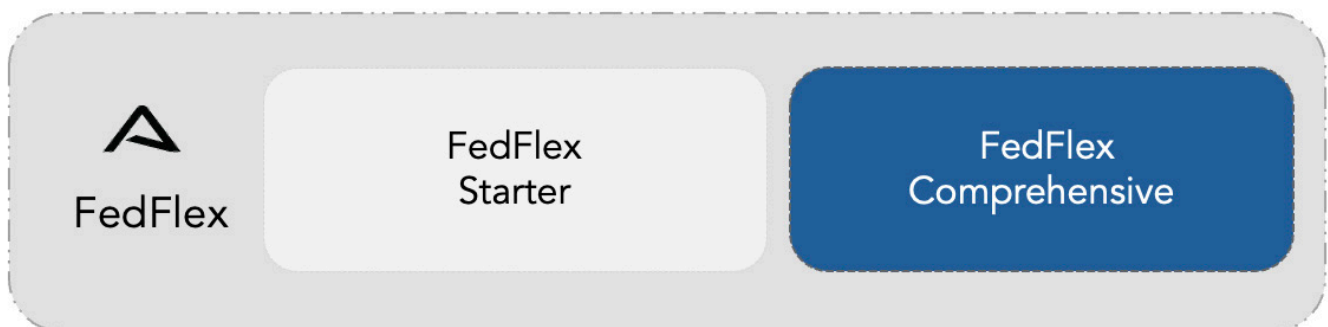

FedFlex by Anitian was purpose-built to change that. As the first AI-powered compliance automation platform designed specifically for SaaS companies, FedFlex enables faster, easier, and more cost-effective paths to FedRAMP authorization—from Low to Moderate or High. Whether you're entering the federal market for the first time or scaling your authorization posture, FedFlex combines automation, pre-configured cloud infrastructure, and embedded expertise to help you move quickly and confidently through every phase of the FedRAMP lifecycle.

## Why FedFlex™

FedFlex is more than just tooling or advisory. It is a fully integrated platform that combines infrastructure, automation, documentation, and continuous monitoring in a single solution. By replacing traditional consulting-heavy processes with intelligent workflows and scalable architecture, FedFlex empowers SaaS companies to:

- Reduce time to FedRAMP authorization by up to 4x
- Cut compliance preparation costs by up to 90%
- Eliminate agency sponsorship requirements (via the FedRAMP 20x program)
- Maintain full control over their Low Authorization or Moderate or High ATO, security posture, and marketplace listing
- Seamlessly scale from Low to Moderate or High

FedFlex was built in alignment with the goals of FedRAMP 20x: faster paths to authorization, machine-readable submissions, and greater automation across the federal compliance lifecycle.

## FedFlex™: Built for Every Stage

From first entry to full-scale compliance, FedFlex meets SaaS teams where they are—delivering speed, predictability, and strategic advantage at every stage of the federal journey.

### FedFlex Starter

For companies pursuing FedRAMP Low Authorization, specifically through the FedRAMP 20x program, FedFlex Starter eliminates the need for an agency sponsor and slashes the time and cost to get started. With pre-built infrastructure, document automation, and expert guidance, it's the fastest, most affordable way to enter the federal market.

- Sponsorless Authorization through FedRAMP 20x
- Fixed-price, audit-ready in as few as 8 weeks
- Ideal for early federal entry or testing public sector demand
- Seamless path to upgrade to Moderate or High

### FedFlex Comprehensive

For SaaS vendors pursuing FedRAMP Moderate or High ATO, FedFlex Comprehensive provides full lifecycle automation and expert support—from gap assessments and document generation to audit prep and continuous monitoring. It includes pre-configured security architecture for AWS and Azure, aligned to FedRAMP Rev. 5 baselines.

- Full automation of documentation, evidence, and testing
- Pre-built, scalable platform architecture
- Integrated monitoring, POA&M tracking, and threat response
- Expert support throughout the process

## Key Platform Capabilities

FedFlex delivers automation, architecture, and advisory support in one platform—so you can meet FedRAMP requirements faster, with less risk and lower overhead.

- **Automated Readiness Assessment:** Evaluates your cloud environment against 85+ FedRAMP controls using pre-built scans for AWS and Azure, generating prioritized remediation actions.
- **Pre-Configured Architecture:** Includes secure-by-default infrastructure components, aligned with FedRAMP Low/Moderate/High baselines, deployable within your environment.
- **AI-Driven Document Automation:** Generates system security plans (SSPs), POA&Ms, test results, and policies in machine-readable formats compatible with 20x expectations.
- **Centralized Evidence Collection:** Streamlines audit prep and submission with a centralized hub for collecting, validating, and packaging required evidence.
- **Expert Advisory:** Ongoing guidance from FedRAMP specialists and cloud security architects to support design, gap closure, and audit prep.
- **Integrated Continuous Monitoring:** Includes threat detection, vulnerability scanning, remediation tracking, and monthly POA&M reporting.

## Strategic Outcomes with FedFlex™

### Who It's For

FedFlex supports security and growth leaders across the organization:

- CISOs seeking visibility, automation, and secure-by-default architectures
- CTOs who need to avoid rework and maintain infrastructure control
- CROs focused on shortening time-to-revenue in the public sector
- Compliance teams managing evolving federal and cloud security requirements

## Get Started with FedFlex
