

SOLUTION BRIEF

FedRAMP Comprehensive

Achieve rapid FedRAMP compliance

About Us

Anitian, powered by Arkenstone, offers a comprehensive suite of FedRAMP compliance solutions tailored to meet the unique needs of SaaS companies seeking authorization to sell their products to federal agencies. Our solution helps to streamline the FedRAMP process, enabling you to achieve audit-readiness within 4-6 months, while reducing preparation costs by as much as 50%. Anitian empowers you to maintain control of your technical stack while driving meaningful market expansion through your own dedicated FedRAMP marketplace listing.

Why Us

With Anitian, powered by Arkenstone, achieving FedRAMP compliance becomes a strategic advantage, opening doors to lucrative government contracts and fostering growth in the public sector market.

Time-to-revenue: Achieve audit-readiness within 4-6 months

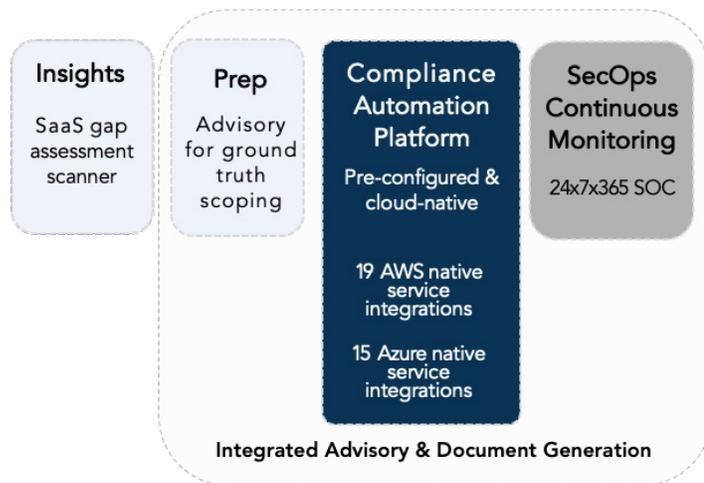

Drive more growth: Own your ATO and maintain a dedicated FedRAMP listing

Reduce Costs: Decrease preparation costs by >50%

Minimize risk: Maintain technical control of your infrastructure

Solution Overview

FedRAMP Comprehensive, our complete solution for companies aiming to make their AWS or Azure-hosted product FedRAMP compliant, prepare for the 3PAO audit, and maintain compliance throughout the FedRAMP lifecycle, includes the following components:

Insights

- SaaS gap assessment scanner
- Programmatically evaluates 85 FedRAMP technical controls in AWS & Azure environments
- Dashboard provides actionable insights and a list of remediation tasks – prioritized by severity

Prep

- Short-term advisory assessment, typically 3 to 4 weeks in duration
- Scoping guidance against the most impactful 144 FedRAMP controls
- Provides high-fidelity clarity on resource requirements and informs project planning

Compliance Automation

Platform

- Cloud-native, pre-configured, automated security platform
- Enables streamlined implementation of technical controls and data collection for securing and monitoring AWS & Azure environments
- Passive data collection for control monitoring
- Built for ease of deployment, robustness & architectural flexibility

Integrated Advisory & Document Generation

- Gap assessments & project planning (including architectural guidance)
- Evidence collection & document generation
- Continuous advising throughout FedRAMP lifecycle

SecOps Continuous Monitoring

- FedRAMP control monitoring & scanning
- Threat detection & response
- Vulnerability management & remediation tracking
- Monthly Plan of Action & Milestone (POA&M) reports
